MUCOSAL GLUTEN REACTIVITY SCREEN™

2 mL oral fluid

- ▶ Secretory IgA
- ▶ Native + Deamidated Alpha-Gliadin-33-mer IgA + IgM Combined
- ▶ Transglutaminase-2 IgA + IgM Combined

CLINICAL USE:

- Early biomarker for defective mucosal immunity, loss of oral tolerance and autoimmunity in the GI tract
- Monitoring compliance with a gluten-free diet

RECOMMENDED FOR PATIENTS WHO:

- Have relatives with gluten reactivity and/or Celiac disease—especially children
- Have a family history of autoimmune disease
