INFORMED CONSENT FOR INTRAVENOUS THERAPY TREATMENT USING DMSO

I, _____, hereby authorize the physician, Ron Mariotti, ND, to perform the following IV procedure: DMSO *IV* on myself. Dr. Mariotti has verbally reviewed the following risks, benefits, contraindications and precautions with me. I have indicated my understanding of each by initialing next to each statement.

Benefits of DMSO:

- 1) _____ DMSO decreases inflammation by preventing or decreasing oxygen or hydrogen peroxide reactions with cell structures.
- 2) _____ DMSO is anti-microbial, anti-fungal, anti-bacterial and anti-viral and increases cellular sensitivity to pharmaceuticals when used synergistically.
- 3) _____ DMSO enhances resistance and decreases susceptibility to infections.
- 4) _____ DMSO is metabolically converted to MSM in the body and thus has all the benefits of MSM.
- 5) _____ Indications for DMSO use are as follows: Atherosclerosis, Interstitial Cystitis, Scleroderma, Reynaud's disease, Lupus (SLE), Rheumatoid Arthritis, Degenerative Arthritis, Ulcerative Colitis, Chronic Obstructive Pulmonary Disease, Reflex Sympathetic dystrophy, Diabetic ulcerations, Burns, Scar Tissue, Close Head injuries, Edema, Strokes, Fibromyalgia, Chronic prostatitis, Dermatologic diseases, Schizophrenia, Alzheimer's disease, Chemical exposures.

RISKS OF DMSO:

- 1) _____ DMSO gives off a characteristic odor described as "sulfur", or "garlic", or "creamed corn".
- 2) _____ At higher doses and high rates of infusion DMSO can cause the following: nausea, vomiting, diarrhea, hemolysis (braking apart of red blood cells), rashes, renal failure, hypertension, bradycardia, pulmonary edema, bronchospasms, cardiac arrest, heart block (rarely), anaphylaxis (flushing and rashes).

CONTRAINDICATIONS:

- 1) _____ None known

CAUTIONS:

- 1) _____ Cardiac issues

POSSIBLE SIDE EFFECTS:

- 1) _____ Hexhmer reactions: body aches, nausea, and occasionally headaches, mild diarrhea and chills without fever.
- 2) _____ DMSO gives off a characteristic odor described as "sulfur", or "garlic", or "creamed corn".

Keep in mind that some of these (Hexhmer reactions: body aches, nausea, and occasionally headaches, mild diarrhea and chills without fever), fatigue skin eruptions flu-like symptoms, can be due to detoxification effects stimulated by hydrogen peroxide.
