## Ayurvedic Constitution

On the following page you will find a relatively short summary self-test of your child's Ayurvedic constitution and is not meant to be exhaustive. Understanding your child's Ayurvedic constitution will help Dr. Mariotti in formulating future treatment plans as well increasing your self-awareness.

Instructions completing this test:

- For each category, put a check in the box that most represents your child. Your child may have characteristics of all three choices. Make a choice, and decide on the box that is the closest to the way your child has been the most consistently throughout their life, especially their earlier years.

- Remember back to your child's earliest childhood years, and compare them to other children at that age. For example, was your child in the chubbiest 1/3, the skinniest 1/3, or the middle 1/3, of, say, 3 year olds?
- Make only 1 check for each category. Do not split answers. Put a check in each category.
- Do not overrate yourself as pitta. Since pitta is in the middle column, many people check the pitta column as a compromise.
- The total of all three columns should equal 20.
