## INFORMED CONSENT FOR INTRAVENOUS THERAPY TREATMENT USING HYDROGEN PEROXIDE

I, \_\_\_\_\_, hereby authorize the physician, Ron Mariotti, ND, to perform the following IV procedure: **HYDROGEN PEROXIDE IV** on myself. Dr. Mariotti has verbally reviewed the following risks, benefits, contraindications and precautions with me. I have indicated my understanding of each by initialing next to each statement.

### **Benefits of Hydrogen Peroxide:**

- 1) \_\_\_\_\_ Immune cells create Hydrogen peroxide in order to attack invading pathogens.
- 2) \_\_\_\_\_ Hydrogen peroxide is produced from vitamin C and stimulates production of prostaglandins, which is partially why vitamin C provides protection from infections.
- 3) \_\_\_\_\_ Lactobacillus produces Hydrogen peroxide, which is beneficial to the colon and vaginal areas.
- 4) \_\_\_\_\_ White blood cells (granulocytes) create Hydrogen peroxide as a first line of defense to oxidize foreign pathogens.
- 5) \_\_\_\_\_ There exist high levels of Hydrogen peroxide in colostrums and breast milk.
- 6) \_\_\_\_\_ Hydrogen peroxide is required for the production of thyroid and reproductive hormones.
- 7) \_\_\_\_\_ Hydrogen peroxide improves the utilization of glucose in diabetics as it increases the production of glycogen production from glucose.
- 8) \_\_\_\_\_ By increasing oxygenation Hydrogen peroxide dilates blood vessels.
- 9) \_\_\_\_\_ In the presence of CoQ-10 Hydrogen peroxide creates intracellular thermogenesis (heat) and allows cells and cellular enzymes to function better.

### **RISKS OF HYDROGEN PEROXIDE:**

- 1) \_\_\_\_\_ Hydrogen peroxide, partially reduced or in excess, can and will cause damage to the cell.
- 2) \_\_\_\_\_ As Hydrogen peroxide is introduced it creates free radicals, which in excess have been responsible for all types of diseases, including premature aging.

### **CONTRAINDICATIONS:**

- 1) \_\_\_\_\_ Anemia
- 2) \_\_\_\_\_ Implants and port
- 3) \_\_\_\_\_ Thalassemia
- 4) \_\_\_\_\_ Pregnancy
- 5) \_\_\_\_\_ Chronic granulomatous diseases (membrane stability diseases) however, it has proven to be clinically beneficial in diseases such as Sarcoidosis and TB.

### **CAUTIONS:**

- 1) \_\_\_\_\_ Chronic joint pain
- 2) \_\_\_\_\_ Active rheumatoid arthritis

### **POSSIBLE SIDE EFFECTS:**

- 1) \_\_\_\_\_ Hexhmer reactions: body aches, nausea, and occasionally headaches, mild diarrhea and chills without fever.
- 2) \_\_\_\_\_ Anxiety
- 3) \_\_\_\_\_ Fatigue
- 4) \_\_\_\_\_ Skin eruptions
- 5) \_\_\_\_\_ Flu-like symptoms
- 6) \_\_\_\_\_ Vasulitis

Keep in mind that some of these (Hexhmer reactions: body aches, nausea, and occasionally headaches, mild diarrhea and chills without fever), fatigue skin eruptions flu-like symptoms, can be due to detoxification effects stimulated by hydrogen peroxide.
